See How They Fared...

ŚMIGIEL | MILICZ | KONSTANCIN-JEZIORNA | TRZEBNICA

Trzebnica chose unique square-based Christmas trees adorned with silver decorations. This original arrangement stands out and embodies the spirit of Christmas.

Contrary to appearances, the flower towers in Konstancin have not disappeared from view. They have been 'hidden' under Christmas covers from the TerraChristmas collection, designed in the shape of Christmas trees. This protects them from damage caused by the harsh December weather.

In Milicz, the flower beds have been landscaped and simultaneously protected from winter weather with dedicated covers. This approach allowed Milicz to avoid any additional expenses related to storing summer decorations or relocating them in early spring.

With the ease of installation of decorations from the TerraChristmas collection, Milicz achieved an immediate festive effect. The most significant benefit is the stunning transformation of the city into a winter wonderland, allowing all residents to feel the magical atmosphere of Christmas.

Śmigiel opted for classic Christmas trees, which are strongly associated with the holiday season. These trees were lined up along one of the town's main streets, and in combination with the covers, they created a harmonious composition that delighted every resident.
